DHRUV SINGH

Business & Data Analyst | SQL | Python | Power BI | Tableau | APIs & Automation
+91 7838019909 | singhd3105@gmail.com | LinkedIn | GitHub | LeetCode

PROFESSIONAL SUMMARY

Business & Data Analyst with 1.5+ years of experience, including internships, turning messy data into dashboards and automated reports across SaaS, finance and operations. Cut a daily data prep task from **3 hours to 40 minutes** at Galytix, worked with a co-founder at Register Karo, and built client demos at Certa that contributed to **4+ closed deals (~$2M)**. Core tools: **SQL, Python, Power BI**, Tableau, **REST APIs**.

TECHNICAL SKILLS

Languages & Querying: SQL (MySQL, SQL Server, BigQuery), **Python**, VBA
Analytics & BI: Power BI, Tableau, DAX, Power Query, Excel, Zoho Analytics, Data Visualization
Data & Statistics: Pandas, Data Cleaning, Exploratory Data Analysis (EDA), Hypothesis Testing, RFM Segmentation, Feature Engineering
Business Analysis: Requirement Gathering, Workflow Design, KPI Design, Stakeholder Reporting, Data Storytelling
Automation & Integrations: REST APIs, JSON, Postman, Zoho Flow, Workflow Automation, Rule Engine Configuration (ECA)
Machine Learning & Tools: Scikit-learn, XGBoost, SHAP, Streamlit, Git, GitHub, Jupyter, Google Colab, VS Code
Core Strengths: Client Communication, Cross-functional Collaboration, Ownership, Problem Solving

PROFESSIONAL EXPERIENCE

Technical Solutions Consultant, Certa **Nov 2025 – Present**

- Translated client business requirements into **18+ automated workflows** and event-condition-action (ECA) rules for vendor onboarding, ESG and Third-Party Risk Management (TPRM) at a SaaS platform, across parent and child workflows.
- Built and delivered **10+** custom pre-sales demos and POCs for customers including Neuberger Berman, using automation to get them to Solution Consultants faster; contributed to **4+ closed deals worth ~$2M** (lead demo builder on 2).
- Contributed to **5+ RFI/RFP responses**, documenting solution approaches, workflow designs and integration requirements.
- Configured JSON workflows and tested REST APIs in Postman to deliver integrations including ID-Pal (identity verification) and RapidRatings (financial health ratings), working with Product and Engineering to fix issues found during implementation.
- Partnered with Product and Engineering to test Certa's Design agent (AI workflow builder) and set up the Contracts Agent that analyzes vendor contracts and documents; resolved client and Solution Consultant issues found along the way.

Data Analyst Intern, Galytix **Apr 2025 – Oct 2025**

- Replaced manual data prep with Excel VBA macros and Power Query, cutting a daily per-file task from **3 hours to 40 minutes** and enabling **6–8 financial reports** to be processed per day, depending on file size.
- Standardized annual and quarterly filing data for the CREDITX Structured Lending Model, giving the Quant team consistent inputs.
- Validated datasets with the Quant team before modeling and fixed the inconsistencies and quality issues found.

Data Analyst Intern, Register Karo **Feb 2025 – Mar 2025**

- Consolidated the company's scattered, unstructured data into a centralized pipeline in the founder's office, where no data team existed, working directly with the co-founder, who used the analysis to make business decisions.
- Queried **857K** customer, order and marketing records in SQL to build **4 Zoho dashboards** for stakeholder reporting on operations turnaround, campaign performance, ad revenue, cost and ROAS, and HR performance.
- Automated recurring reports with Zoho Flow, improving operational efficiency by **25%** and removing hours of manual data cleaning.

PROJECTS

Marketing Analytics & Customer Intelligence | *Python, Pandas, SQL, Power BI* GitHub

- Cleaned and analyzed **10K** customers, **59.9K** orders and **119.9K** campaign interactions across 24 campaigns in Python and MySQL, measuring **₹896M** revenue and **₹199M** profit and comparing acquisition channels and customer segments.
- Designed a 4-page Power BI dashboard (revenue, profit, AOV, profit/customer) with RFM segments and budget-per-conversion analysis; found Organic is the largest acquisition channel at **23%** of customers.

E-commerce Revenue & Customer Intelligence | *Python, Pandas, SQL, Tableau* GitHub

- Evaluated **34,356+** order items (**₹295M** revenue, 44.1% margin) and found Electronics drives about **66%** of revenue.
- Segmented 4,861+ customers with RFM (**89%** repeat buyers), traced **56.6%** of returns to size and quality issues and built 3 Tableau dashboards (20+ KPIs) for executive, customer/product and returns views.

Crypto Market Analytics | *Python, CoinGecko API, BigQuery, SQL, Power BI* GitHub

- Pulled 25 coins per snapshot from the CoinGecko API, validated schema and duplicates, and appended each snapshot to BigQuery to build a history of price, market cap, volume and rank changes.
- Wrote SQL views for KPIs and rank changes, keeping latest and historical snapshots separate so market cap is never double-counted.

Customer Churn Prediction & Retention | *Python, Scikit-learn, XGBoost, SHAP, Streamlit* GitHub

- Explored **7,043** customer records with feature engineering and statistical tests, then compared Logistic Regression and tuned XGBoost (**0.843 ROC-AUC**), setting a 0.35 threshold for **71.9% recall** at 56.0% precision.
- Developed a Streamlit app with SHAP explanations that flags a high-priority group of 140 customers with **73.6%** observed churn, against 11.3% for standard-engagement customers, giving retention teams a prioritized action queue.

EDUCATION

B.Tech in Information Technology, Inderprastha Engineering College (CGPA: 7.5) **Dec 2020 – Jul 2024**

CERTIFICATIONS

Microsoft Power BI Data Analyst (Coursera) | Complete Data Analyst Bootcamp (Udemy) | The Ultimate MySQL Bootcamp (Udemy)
